Market Trends

TIP

One of the common trends in the lawn care and landscaping industry is that it takes consistent effort to convince homeowners to hire the services of lawn care and landscaping companies. The truth is that homeowners who have enough time can actually take care of their lawn; all they need is just a little training.

Strengths

Our strength as a lawn care and landscape company is the fact that we have healthy relationships with loads of homeowners (residents) within the area where our business is located. We have some of the latest equipment that will help us deliver neat and excellent jobs.

Aside from our relationship (network) and equipment, we can confidently boast that we have some of the qualities that are in high demand in the lawn care and landscaping line of business which are trust, honesty, and relationship management.

S

Weaknesses

Our weakness could be that we are a new lawn care and landscaping company in Detroit, Michigan and it will require consistency for us to gain the confidence of our prospective clients (homeowners, property managers, and even the government).

W

Opportunities

The opportunities that are available to us cannot be quantified; we know that there are loads of homeowners, property managers, and government establishments that will require our services in Detroit and other cities in Michigan.

O

Threats

Some of the threats that we are likely going to face as a lawn care and landscaping company are global economic downturn that can impact negatively on household spending and the arrival of a competitor (a company that offers the same service as we do) within the same location. There is hardly anything we could do as regards these threats other than to be optimistic that things will continue to work for our good.
